When you do not have a separate accounting at all, just use the default expense model for all work orders. Choose the default expense categories for every item on the work order.

Whenever you create a work order, you *must* use the default expense model. Do not set up your own expense models, use the default model.

Save: Saves the given information. The window stays open in case you want to make more changes.

Selecting Multiple Table Entries

- When repairing a unit, you can use the unit itself as a temporary storage location. For example, in a shopping mall, each store may be considered a unit. When renovating a store for a new tenant, you can use the store itself as temporary storage for renovation materials. Similarly, when performing lengthy repairs on a piece of
